

# Forge named one of the nation's fastest-growing companies

*Two years in a row!*

Forge ranks **#1643** on Inc. 5000 Fastest-Growing Companies List

**#40** In Government Services, Nationally

**#87** In Washington-Arlington-Alexandria, DC-VA-MD-WV

## TWO YEARS IN A ROW ISN'T A FLUKE.

Achieving nationally recognized year-over-year growth is one thing; repeating it is quite another. The required percentage growth rate becomes more challenging as companies grow. Forge has not only maintained impressive growth that secures its place on the list once more - but has also achieved a position in the top 40%. How? A lot of nuanced excellence and grit on hard days - but mainly by being unapologetically focused on niche missions, making creative, bold business decisions, and focusing on people - staff & clients,

*"With over 7 million employee-based businesses in the US, ranking is an astounding achievement — you are in the top .1% of companies."*

*— Inc. Magazine, VP Corporate Business Development, Aug 2024*

**875%** Forge Growth since 2019    **77%** Forge Compound Annual Growth Rate since 2019

## FORGE SETS-UP FOR THE FUTURE THEY WANT.

This recognition, unarguably based on numbers, demonstrates that Forge is outpacing the pack — and not only in the GovCon sector but in all businesses across the country. But perhaps more important than the growth numbers themselves is how and where growth happens. This intentional, selective growth allows Forge to maintain a cherished culture, pave new, exciting paths for Forge's long-term staff, and set itself up for the success it wants.

Preparation, foresight, and collaboration uniquely prepare niche teams for the next phase. The Leadership team stays ahead of the pitfalls of growth by expanding operations teams, thinking beyond what is currently capable, and continuing to be firmly focused on select missions.

The future of Forge is exciting and evolving. With big ideas on the horizon, together — clients and teams, governments and technology partners — confidently move forward in sync — unafraid to improve and strengthen the world.

*"To see all of the intriguing and surprising ways that [these] companies are transforming sectors... is fascinating for me..."*
